DETAILED ACTION

Allowable Subject Matter

1. **Claims 37-44** are allowed.

The following is a statement of reasons for allowance:

As for independent claims 37 and 44, they teach a medium containing a spelling for an ideographic symbol having a shape. Prior art such as King show a similar medium, but fails to teach that each ideographic symbol takes the first, second and third component into consideration. That is, each symbol considers the first component comprising alphanumerals providing a spelling of the phonetics of the ideographic symbol, the second component comprising alphanumerals providing an indication of the shape of the ideographic symbol and the third component comprising a differentiator providing a unique identification of the ideographic symbol. While King teaches Pinyin and four corners to recognize a single character, King does not take into consideration using both four corners and Pinyin together to recognize an ideographic symbol neither does King specifically teach that the information is stored on a table, in order to eliminate the recognition ambiguity.

Dependent claims 38-43 are allowed because they further limit their parent claims.
